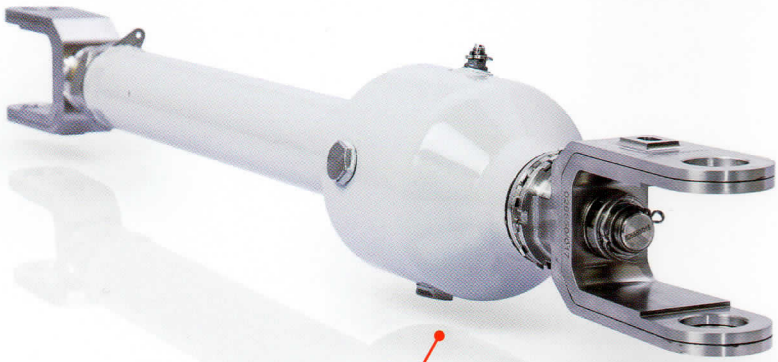
Gummi-Metall-Technik GmbH

Pantecnica®
ENGINEERED SOLUTIONS

Ideas ahead

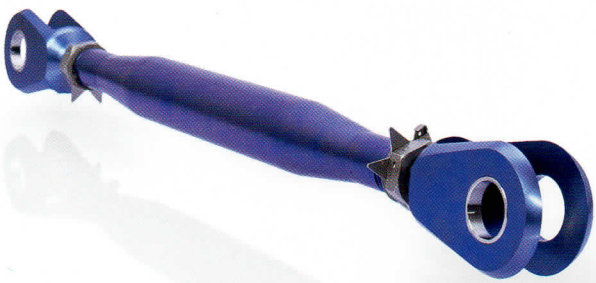
The aircraft division of GMT GmbH is specialized in customized development, design, qualifying and production of vibration and shockmount systems as well as structure stabilizing elements.

Innovation and short lead times are characteristics of our work and our products.



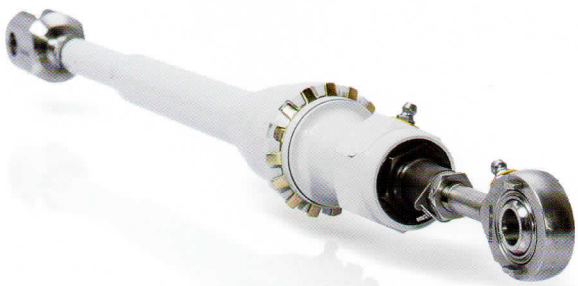
Fairing Failsafe Strut

Failsafe detection solution



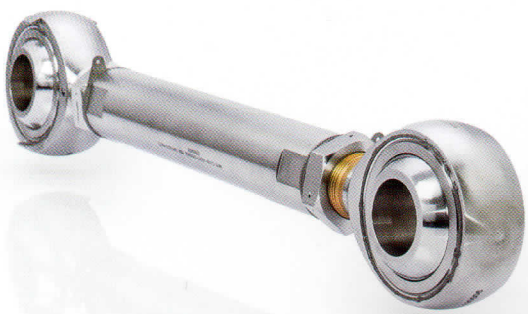
Full Titanium Rod

Our strongest solution – developed for eternity



Rotating Rod

Extreme rotating



Drive Strut

High-end development

Folding Strut

Innovative customized solutions

Pantecnica®
ENGINEERED SOLUTIONS

Due to our expertise and forty years of experience we achieve effective solutions in developing tie rods, bushes, anti-vibration dampers, hose holders, fastening parts, seals and shock absorbers for hydraulic systems and cabin interiors.

We develop – You make it fly.

GMT®
Gummi-Metall-Technik GmbH

ABS 1214

Our multiple standard application solution

Floor Beam Strut

Carbon structural rod

Upper Deck Strut

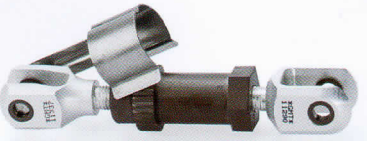
Carbon light weight solution

ABS 2180

Customized light weight solution

EN 4694

EN Norm GMT-Rods Kit customized solution at Trace Parts



A320 Y-Rod

Enhancing your flight comfort
